

**REMARKS**

Applicant has modified the independent claims to eliminate the reference to the claim language which the Examiner has asserted not to be in compliance with the written description requirement of §112. Applicant submits that the new claim modifications, as well as newly submitted claim 7, accurately define the subject matter of the instant invention and distinguish over the art of record.

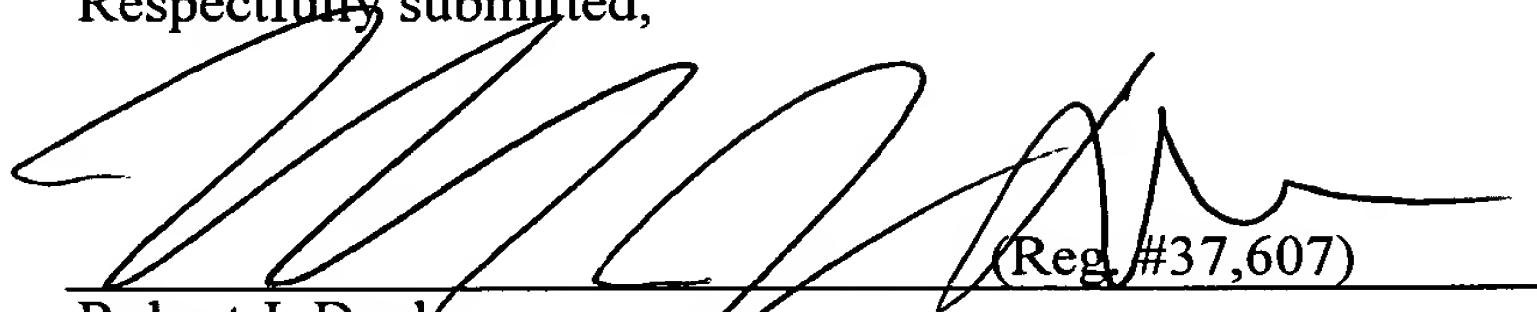

More specifically, applicant submits that the prior art of record does not teach or suggest a semiconductor package wherein a space between the positioning hole and the attaching hole at one side is narrower than the diameter of either one of the two holes. Furthermore, new claim 7 alternately defines the invention and further distinguishes over the art by specifying that one pair of positioning and attaching holes is on a first side wall, and the second positioning and attaching hole is on a second side wall as set forth in claim 7, wherein a line bisecting the package separates the respective positioning and attaching holes on either side of the package. This specified structure advantageously allows highly accurately placement while allowing convenient positioning of the chip.
